## Slide 2

Graphs What is Graph? Representation of Graph Matrix representation of Graph Linked List representation of Graph Elementary Graph Operations Breadth First Search (BFS) Depth First Search (DFS) Spanning Trees Minimal Spanning Trees Shortest Path

## Slide 3

Adjacency matrix A diagrammatic representation of a graph may have limited usefulness. However such a representation is not feasible when number of nodes and edges in a graph is large. It is easy to store and manipulate matrices and hence the graphs represented by them in the computer. Let  $G = (V, E)$  be a simple diagraph in which  $V = \{v_1, v_2, \dots, v_n\}$  and the nodes are assumed to be ordered from  $v_1$  to  $v_n$ . An  $n \times n$  matrix  $A$  is called Adjacency matrix of the graph  $G$  whose elements are  $a_{ij}$  are given by  $a_{ij} =$

## Slide 4

Adjacency matrix An element of the adjacency matrix is either 0 or 1. Any matrix whose elements are either 0 or 1 is called bit matrix or Boolean matrix. For a given graph  $G = m(V, E)$ , an adjacency matrix depends upon the ordering of the elements of  $V$ . For different ordering of the elements of  $V$  we get different adjacency matrices.

$V_1$	$V_2$	$V_3$	$V_4$	0	1	0	1	1	0
0	0	1	1	0	1	0	0	V	1

$V_1 V_2 V_3 V_4 0 1 0 1 1 0 0 1 1 0 1 0 1 0 0 V_1 V_1 V_2 V_2 V_3 V_3 V_4 V_4 A =$

## Slide 5

Adjacency matrix The number of elements in the  $i$  th row whose value is 1 is equal to the out-degree of node  $V_i$ . The number of elements in the  $j$  th column whose value is 1 is equal to the in-degree of node  $V_j$ . For a NULL graph which consist of only  $n$  nodes but no edges, the adjacency matrix has all its elements 0 . i.e. the adjacency matrix is the NULL matrix

$V_1$	$V_2$
-------	-------

V 3 V 4 0 1 0 1 1 0 0 0 1 1 0 1 0 1 0 0 V 1 V 1 V 2 V 2 V 3 V 3 V 4 V 4 A =

## Slide 6

Power of Adjacency matrix Entry of 1 in i th row and j th column of A shows existence of an edge (V<sub>i</sub>, V<sub>j</sub>) , that is a path of length 1 Entry in A 2 shows no of different paths of exactly length 2 from node V<sub>i</sub> to V<sub>j</sub> Entry in A 3 shows no of different paths of exactly length 3 from node V<sub>i</sub> to V<sub>j</sub> 0 1 0 1 1 0 0 0 1 1 0 1 0 1 0 0 A = A 2 = A x A = 1 1 0 0 0 1 0 1 1 2 0 1 1 0 0 0 1 1 0 1 1 1 0 0 2 2 0 1 0 1 0 1 A 3 = 1 2 0 1 1 1 0 1 2 3 0 2 1 1 0 0 A 4 =

## Slide 7

Path matrix or reachability matrix Let G = (V,E) be a simple diagraph which contains n nodes that are assumed to be ordered. A n x n matrix P is called path matrix whose elements are given by

## Slide 8

Adjacency List Representation 0 1 3 2 4 0 1 2 3 4 1 2 3 4 0 3 0 3 4 0 1 2 4 0 2 3

## Slide 9

Graph Traversal Two Commonly used Traversal Techniques are Depth First Search (DFS) Breadth First Search (BFS)

## Slide 10

Depth First Search (DFS) It is like preorder traversal of tree Traversal can start from any vertex V<sub>i</sub> V<sub>i</sub> is visited and then all vertices adjacent to V<sub>i</sub> are traversed recursively using DFS 1 2 3 4 5 6 7 8 DFS (G, 1) is given by Step 1: Visit (1) Step 2: DFS (G, 2) DFS (G, 3) DFS (G, 4) DFS (G, 5) DFS (G, 2): Step1: Visit(2) Step 2: DFS (G, 6) DFS (G, 6): Step1: Visit(6) Step 2: DFS (G, 3) DFS (G, 8) DFS of given graph starting from node 1 is given by 1 2 6 3 8 7 4 5 v v v v v v v v

## Slide 11

Depth First Search (DFS) A B C D E F G H A B C D E F R M Q N P O A B D H E C F G v v v v v v v v A B D C F E v v v v v v v

## **Slide 12**

Breadth First Search (BFS) This methods starts from vertex V 0 V 0 is marked as visited . All vertices adjacent to V 0 are visited next Let vertices adjacent to V 0 are V 1 , V 2 , V 2 , V 4 V 1 , V 2 , V 3 and V 4 are marked visited All unvisited vertices adjacent to V 1 , V 2 , V 3 , V 4 are visited next The method continuous until all vertices are visited The algorithm for BFS has to maintain a list of vertices which have been visited but not explored for adjacent vertices The vertices which have been visited but not explored for adjacent vertices can be stored in queue

## **Slide 13**

## **Slide 15**

Procedure : DFS (vertex V) This procedure traverse the graph G in DFS manner. V is a starting vertex to be explored. Visited[] is an array which tells you whether particular vertex is visited or not. W is a adjacent node of vertex V. S is a Stack, PUSH and POP are functions to insert and remove from stack respectively.

## **Slide 16**

Procedure : DFS (vertex V) 1. [Initialize TOP and Visited] visited[] ? 0 TOP ? 0 2. [Push vertex into stack] PUSH (V) 3. [ Repeat while stack is not Empty ] Repeat Step 3 while stack is not empty v ? POP() if visited[v] is 0 then visited [v] ? 1 for all W adjacent to v if visited [w] is 0 then PUSH (W) end for end if

## **Slide 17**

Procedure : BFS (vertex V) This procedure traverse the graph G in BFS manner V is a starting vertex to be explored Q is a queue visited[] is an array which tells you whether particular vertex is visited or not W is a adjacent node f vertex V.

## **Slide 18**

Procedure : BFS (vertex V) 1. [Initialize Queue & Visited] visited[] ? 0 F ? R ? 0 2. [ Marks visited of V as 1 ] visited[v] ? 1 3. [ Add vertex v to Q ] InsertQueue (V) 4. [ Repeat while Q is not Empty ] Repeat while Q is not empty v ? RemoveFromQueue () For all vertices W adjacent to v If visited[w] is 0 Then visited[w] ? 1 InsertQueue (w)

## **Slide 19**

Spanning Tree A Spanning tree of a graph is an undirected tree consisting of only those edges necessary to connect all the nodes in the original graph A spanning tree has the properties that For any pair of nodes there exists only one path between them Insertion of any edge to a spanning tree forms a unique cycle The particular Spanning for a graph depends on the criteria used to generate it If DFS search is use, those edges traversed by the algorithm forms the edges of tree, referred to as Depth First Spanning Tree If BFS Search is used, the spanning tree is formed from those edges traversed during the search, producing Breadth First Spanning tree

## **Slide 20**

Construct Spanning Tree A B C D E F G H A B C D E F G H DFS Spanning Tree BFS

## **Slide 21**

Minimum Cost Spanning Tree The cost of a spanning tree of a weighted undirected graph is the sum of the costs(weights) of the edges in the spanning tree A minimum cost spanning tree is a spanning tree of least cost Two techniques for Constructing minimum cost spanning tree Prim's Algorithm Kruskal's Algorithm

## **Slide 22**

Prims Algorithm A B C D E 4 2 1 7 5 3 6 6 5 A - B | 4 A - E | 5 A - C | 6 A - D | 6 B - E | 3 B - C | 2 C - E | 5 C - D | 1 D - E | 7 Let X be the set of nodes explored, initially X = { A } A Step 1: Taking minimum Weight edge of all Adjacent edges of X={A} A B 4 X = { A , B } Step 2: Taking minimum weight edge of all Adjacent edges of X = { A , B } A B 4 2 C X = {A ,B,C} Step 3: Taking minimum weight edge of all Adjacent edges of X = { A , B , C } A B 4 2 C D 1 X = {A,B,C,D} A B 4 2 C D 1 X = {A,B,C,D,E} Step 4: Taking minimum weight edge of all Adjacent edges of X = {A ,B ,C ,D } E 3 We obtained minimum spanning tree of cost : 4 + 2 + 1 + 3 = 10

## Slide 23

Kruskal's Algorithm A B C D E 4 2 7 5 3 6 6 5 Step 1: Taking min edge (C,D) 1 C D 1 Step 2: Taking next min edge (B,C) B C D 2 1 Step 3: Taking next min edge (B,E) B C D E 2 3 1 Step 4: Taking next min edge (A,B) B C D E 2 3 1 A 4 so we obtained minimum spanning tree of cost :  $4 + 2 + 1 + 3 = 10$

## Slide 24

MARUTI SUZUKI ARENA

MARUTI SUZUKI ARENA

PRESENTING  
**VICTORIS**  
GOT IT ALL

## FOR THE DRIVE INSIDE YOU THAT WANTS IT ALL

Maybe it's the way it stands. Unshaken. Self-assured.  
Maybe it's the way it moves. As if it owns the road.  
The Victoris is for the ones who know when to hold back, and when to go all out.  
Who seek out new adventures, new experiences.  
Who refuse to settle for anything less than everything.

For the ones who have it all. An SUV that's:

## GOT IT ALL

## THE CHISELED LOOK THAT SAYS IT ALL

»»

The Victoris speaks in a design language that's impossible to ignore. Its sweeping silhouette and sculpted lines create a stance that's dynamic when in motion and commanding when still. The seamless tail light stretches across the rear, leaving a signature that lingers long after it's gone.

## CRAFTED FOR ALL YOUR SENSES

>>

A cabin tailored for those who know what they want. Everything. With a touch of class.

Its expansive design with dual-tone interiors, panoramic sunroof, vibrant 64-colour ambient lighting, right down to the elegant three-level dashboard with precision stitching; creates a space that serenades all your senses.

PANORAMIC SUNROOF

PLUSH LEATHERETTE SEATS

ALL YOU NEED  
FOR COMPLETE  
PEACE OF MIND

>>

Safety is more than just a feature. It's a promise. It's the quiet assurance that's inherent to every aspect of the Victoris. Where advanced driver-assist technology works seamlessly with intuitive features to create a drive that feels unshakably secure. So, while the road may throw its share of surprises, you stay confidently in control.

6 AIRBAGS STANDARD

FRONT PARKING ASSIST SENSOR WITH  
AUTO 360° CAMERA ACTIVATION

360° VIEW HD CAMERA  
WITH 11 VIEWS

ELECTRONIC PARKING BRAKE  
WITH BRAKE HOLD

SUZUKI TECT PLATFORM

## ADVANCED LEVEL 2 ADAS

Real confidence comes from knowing that your car is always thinking two steps ahead.  
The Level 2 ADAS on the Victoris preempts, and protects you, as your ever-present guardian.

### LEVEL 2 ADAS\* FEATURES

- Lane Keep Assist
- Automatic Emergency Braking
- Forward Collision Warning
- Blind Spot Monitor with Lane Change Alert
- Adaptive Cruise Control with Curve Speed Reduction
- High Beam Assist
- Lane Departure Prevention
- Lane Departure Warning
- Rear Cross Traffic Alert
- Vehicle Sway Warning

\*Advanced Driver Assistance System (ADAS) is not a substitute for human eye and driver vigilance, it is a driver assist system that enhances driving experience and safety. The system performance may vary from road and driving conditions. The driver shall remain responsible for safe, vigilant and attentive driving. Features and specifications may vary model wise.

### SMART POWERED TAILGATE WITH GESTURE CONTROL

Hands full? Just a swipe with your foot makes access to the boot effortless.

## ALL-IN ON COMFORT

In the Victoris, comfort begins long before the journey does. It starts the moment you settle in. The cool embrace of the ventilated seats. The effortless reach of every control. Every aspect of the Victoris adjusts to your personalised comfort to ensure that the road ahead feels less like travel and more like an experience.

8-WAY POWERED DRIVER SEAT

26.03cm MULTI-INFORMATION DIGITAL CLUSTER

AUTO PURIFY WITH PM2.5 DISPLAY

VENTILATED FRONT SEATS

## ALL THE TECH. ALL FOR YOU.

Experience intuitive tech at its best with the Smartplay Pro X Touchscreen Infotainment System. With all your preferred connectivity features, an extensive app store, and a host of personalization options, the Victoris creates a space that's a reflection of you.

**infinity**  
by HARMAN | Dolby  
ATMOS

### IMMERSIVE INFINITY SPEAKERS WITH DOLBY ATMOS 5.1 SURROUND SOUND

Every whisper, every raindrop gets its own spotlight with 8 finely-tuned speakers from Infinity by Harman. The immersive 5.1 Channel Dolby Atmos Surround Sound sets the stage for the most vibrant crescendos and dramatic silences. Your drive is where the sound comes alive.

#### NEXT GEN SUZUKI CONNECT WITH E-CALL

With over 60 smart features, get real-time insights, emergency alerts and vehicle status, on your smartwatch or mobile. The next-gen Suzuki Connect helps you stay connected, informed, and in control, wherever you go.

#### ALEXA AUTO ON-BOARD

Now take Alexa along for the drive with Alexa Auto Voice AI and over 40 smart features. Stream music, ask questions, and even control smart appliances at home. Experience hands-free convenience, designed for the road.

## PERFORMANCE THAT GOES ALL OUT.

From quick sprints to steady climbs, the Victoris adapts seamlessly to every road and every mood. Agile when the moment calls for it, effortless when the journey demands it. Every drive is tuned to respond to you, delivering exhilaration and calm in equal measure.

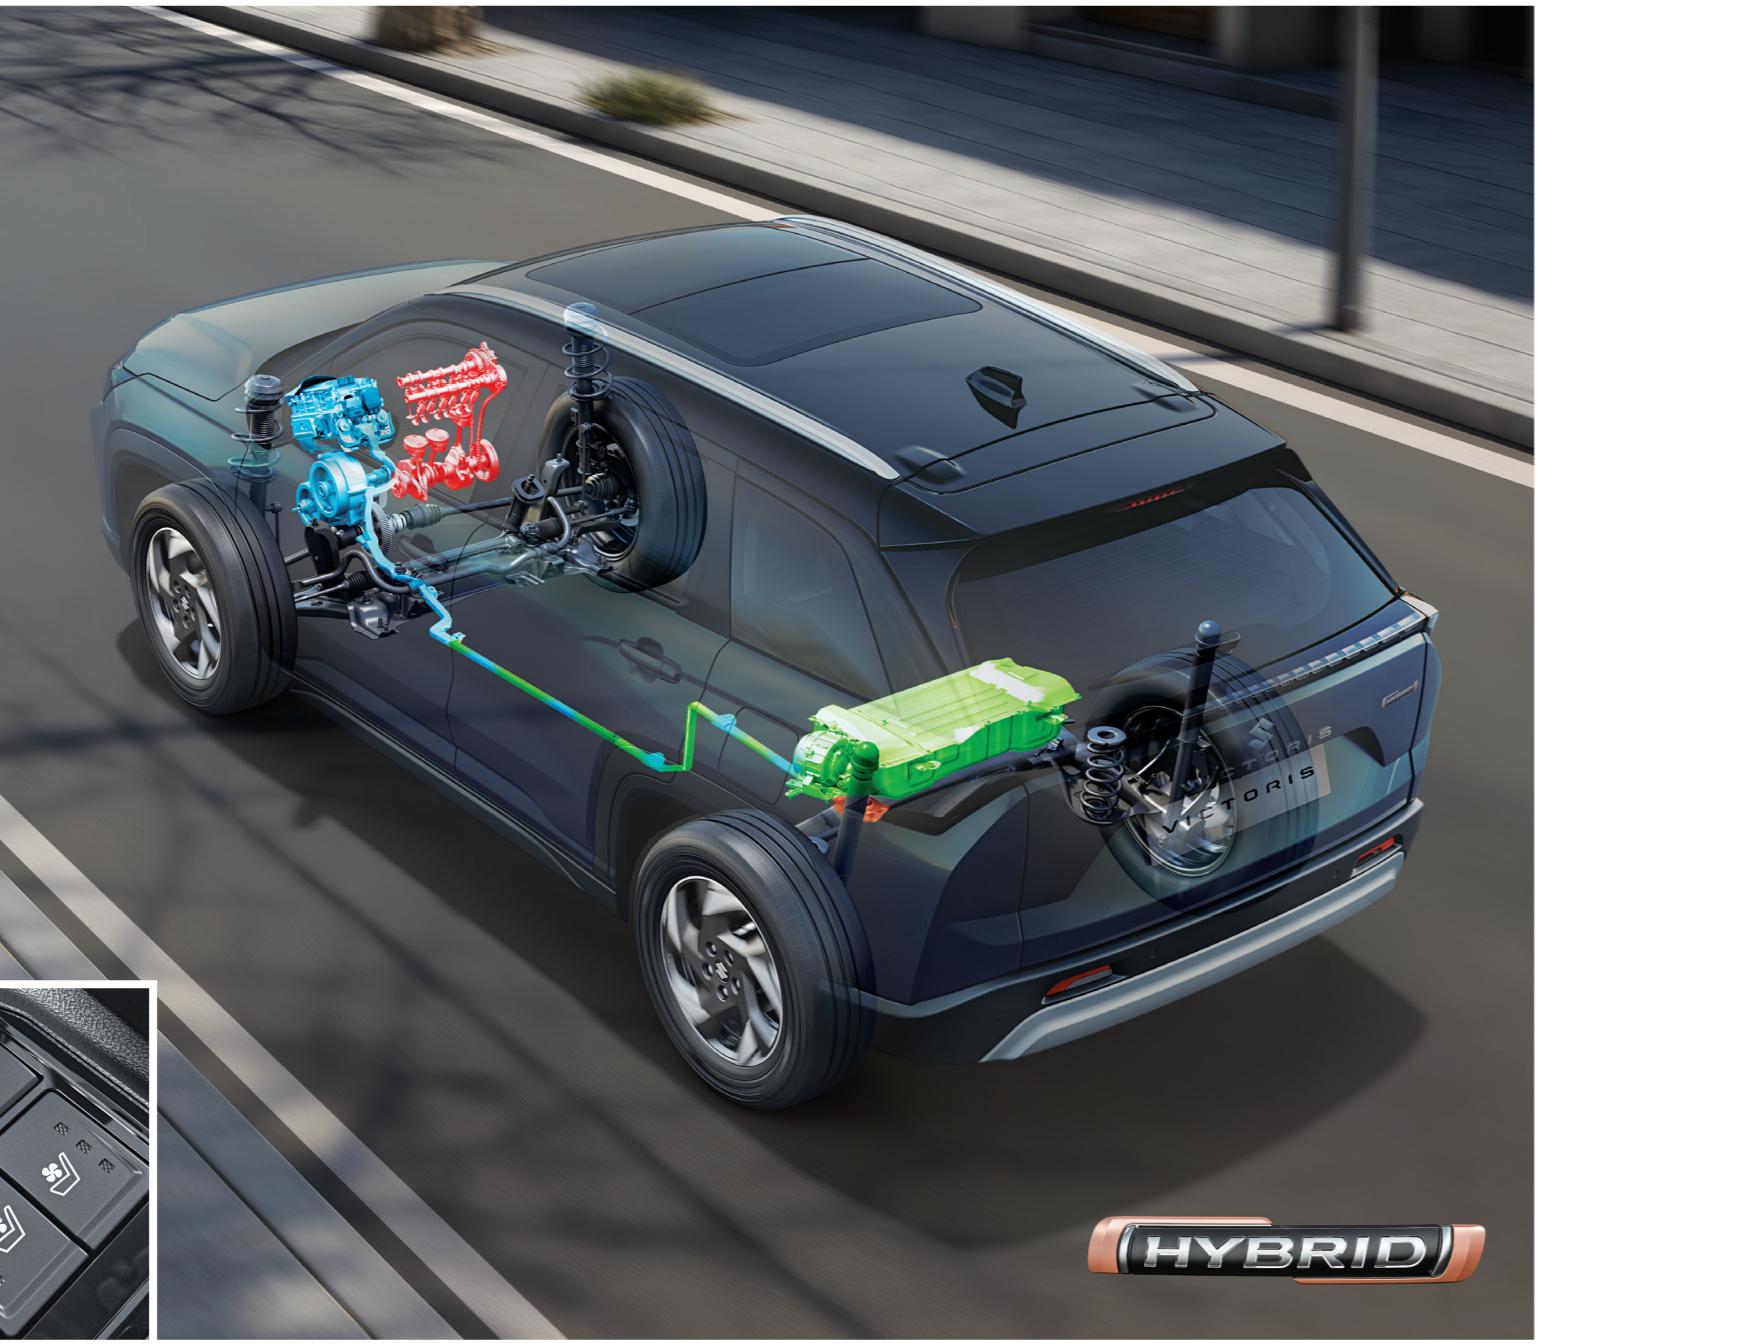

AVAILABLE IN:

## FUTURISTIC STRONG HYBRID

For the ones who prefer power without compromise, the Strong Hybrid is the perfect ally. Paired with a battery pack, its refined and silent drive delivers a performance that's smooth, confident, and efficient. With the Victoris, expect nothing less than everything.

## ALL-TERRAIN ALLGRIP SELECT

For the ones who own every road they tread, the Victoris with Suzuki ALLGRIP Select is the ultimate companion. From city streets to untamed trails, it adapts seamlessly to challenging terrains, delivering a drive that is as controlled as it is adventurous. Powerful, commanding, and uncompromising, at every turn.

**ALLGRIP**

## ALL-NEW UNDERBODY S-CNG

>>

A clear boot space with a clean conscience. The Victoris with factory-fitted underbody S-CNG ensures that every journey remains uncompromised. Its clean engine exceeds the fuel efficiency you expect. Its clever design frees-up every inch of your boot space. Its in-built safety features preserve your peace of mind. It's a win-win-win for the Victoris.

## THE EXHILARATING SMART HYBRID

>>

The always reliable K15C engine with progressive mild hybrid technology spoils you for choice. Feel every gear shift with a 5-Speed Manual Transmission as it delivers the perfect balance of power and precision for the purist. 6-Speed Automatic Transmission with paddle shifters let you effortlessly switch between control and convenience. When every shift is smooth, and every acceleration confident, you feel like you own the world - all of it.
